

NATIVE PLANTS FOR PARTIAL SHADE

These are plants that benefit from some shade during the day. Many grow naturally at the edge of woods or along streams where they may receive 2 to 6 hours of direct sun each day. Others thrive in a filtered sunlight environment.

WILDFLOWERS					
Common Name	Botanical Name	Color	Moisture	Height	Bloomtime
Blue Star	<i>Amsonia tabernaemontana</i>	Light Blue	avg.-moist	1-3 ft.	April
Pussytoes	<i>Antennaria sp.</i>	White-Grey	well-drained	groundcover	May
Columbine	<i>Aquilegia canadensis</i>	Red & Yellow	well-drained	1-3 ft.	April
